Experience

Deltek

Aug 2025 – Present

Associate Software Engineer

Bangalore, India

- Engineered complex business logic across Payrule, Workflow, Validation, Accrual, and Approval systems for enterprise clients (e.g., **CAPG, Wipro, Serco**), with high test coverage.
- Designed and shipped DPL, a real-time engagement platform (React, Node.js, PostgreSQL, Socket.IO, WebRTC) supporting **100+ Daily Active Users** with live chat, voice communication, and real-time event streaming.
- Architected a **Production-grade RAG system** with FastAPI, pgvector, and LLMs, enabling citation-backed document querying with improved search relevance.
- Recognized as a contributor in the team with the **highest productive hours in Q1 2026**, supporting timely delivery of key engineering projects.

DiscoverrAI

Apr 2025 – Aug 2025

Software Engineer Intern

Bangalore, India

- Developed an AI-powered recommendation system for Shopify using Azure, improving personalization and reducing response latency in recommendation pipelines.
- Optimized backend APIs and inference pipelines, reducing response latency and improving recommendation accuracy.
- Built an admin dashboard to orchestrate and monitor AI pipelines, improving debugging efficiency and reducing issue resolution time.

Projects

Human-Centric Pose Estimation | Python, MediaPipe, LSTM, OpenCV

- Built an LSTM-based action recognition system achieving **92.5% accuracy** on real-time pose sequences.
- Engineered 10+ pose features from video streams using MediaPipe, enabling efficient edge-based inference.
- Processed and annotated 40+ video sequences to train models for multi-action human activity recognition.

G-BUDDY – Student Resource & Marketplace Platform | MongoDB, Express.js, React.js, Node.js | <https://g-buddy.vercel.app/>

- Developed a full-stack platform for academic resource sharing and marketplace interactions, enhancing collaboration.
- Implemented features like PDF sharing, chatbot assistance, and structured content organization for efficient access.
- Designed scalable backend APIs and integrated dynamic frontend components for seamless user experience.

BlogX – Scalable Blogging Platform | React.js, PostgreSQL, Prisma, Cloudflare Workers | <https://blogx1.netlify.app/>

- Built a full-stack blogging platform with JWT-based authentication and **scalable backend architecture** for management.
- Optimized performance using **pagination and lazy loading**, improving data rendering efficiency under usage.
- Deployed backend on **Cloudflare Workers**, enabling low-latency, edge-based request handling and scalable traffic.

Technical Skills

Languages: JavaScript, TypeScript, Python, Java, C, SQL.

Backend & Databases: Node.js, Express.js, FastAPI, REST APIs, WebSockets, Server-Sent Events (SSE), PostgreSQL, MongoDB, MySQL, pgvector.

Frontend & Tools: React.js, Next.js, TailwindCSS, Prisma, Drizzle ORM.

Cloud & Concepts: AWS (S3, RDS), Microsoft Azure, Docker, System Design, Distributed Systems, Microservices, Asynchronous Programming, Real-Time Systems, RAG.

Achievements & Certifications

- Secured **All India Rank under 5,000** in **GATE 2024 (Data Science & AI)**.
- Secured **2nd place** in Hackfest 2024 among 50+ teams for a real-time parking management system using computer vision.
- Secured **1st place** in Internal SIH 2023 among 120+ teams for a crowd monitoring and crime prevention system.
- Completed **Machine Learning Specialization** (Stanford Online), **AWS ML Foundations**, and **GFG Advanced DSA Certification**.
